

How to Automate Social Posting Fulfillment

When reviewing and testing the seemingly endless number of options for social posting services I chose one that I really liked it and it worked well. However, since then I recently discovered a new, and for some people, better alternative.

Why is this new option the best? Two huge reasons:

1. It is ridiculously fair priced
2. It's also a full-service provider. Meaning, they do everything for you!

It's unheard of the level of service and support you get from this vendor.

I asked Jeanne the "Social Posting Queen" Kolenda herself to make a special offer for my customers. And she agreed. In fact, she has two options to choose from:

Option 1: All Access Pass (Recommended)

- Done-for-you social posting for 10 clients. Includes use of all images and videos for over 60 niches!
- <https://mcplr.net/sps-all-access-pass>

Option 2: Advanced Posting Services

- Done-For-You social posting for up 10 clients. Must use your own images.

*** Second Fulfillment Option Through PostPlanner ***

Even though my recommended solution for fulfillment is described above I have received feedback that some people would like a second option.

Jeanne's offer is amazing and literally takes pretty much all the work off your plate and allows you to just focus on getting new customers.

However, if you're one of the people that want a second option then please watch the video below. And if this seems like a better fit for you and your business then click the button below the video to be taken to PostPlanner directly.
